

### Elect Women to Public Office

certainty eludes  
women and men seek our vote  
so how can we choose?

which better to lead  
as stewards of public trust?  
what does science say?\*

man fancies power  
seeks status, rank, control, fame  
hierarchy first

woman cares, nurtures  
empathy dwells in her core  
relationships first

election day's choice  
the message of this haiku:  
*vote women to lead!*

\* These are general sociological findings; many individual exceptions occur.
