

**Whence Reality?**

how come existence?  
the ultimate mystery  
yet, we're here to ask

something from nothing?  
why not just blank empty space?  
or not even that?

if god, then whence god?  
prescience mystics conjured  
a "super"-nature?

whence mathematics?  
numbers without universe  
if nothing to count?

no answers quench thirst,  
so why ask vexing questions?  
just wondering, awed
