

Happy Holidays

it's Solstice, earthlings!
winter holidays' mother
foresees longer days

Christmas, Hanukkah,
Kwanzaa ... and there's Festivus
for the rest of us

in science predawn
ancients tried to make sense by
magical thinking

inventors of faiths,
authors of holy books lived
north of equator

Earth's axial tilt
from solar orbital plane
is magic enough!

With the Connor clan at Stonehenge, 6 October 2014

Revised 7 December 2022
