

I Rite Perdy Good

from retirement's perch
looking back on my career
seems I did okay

but how? what's the key?
others were smarter than I
they worked much harder

they got better grades
clearly more self-disciplined
better study skills

more self-confident
more talented public speakers
their social skills shine

what's my secret sauce?
just maybe it's simply this:
I rite perdy good*

* Well, yes, white male privilege helped.
