

Nature's Killing Machine

being begets pain,
our planet hosts misery,
birth damns us to life

food animals live
lives of torture and torment,
endless holocaust

human hierarchies
bring wars, tyrants, hunger, death,
wielding leaders' club

I'm a tiny cog
in nature's killing machine,
evolution's craft

does joie de vivre
outweigh constant suffering
on life's balance scale?

Photo source: NASA. All sentient creatures, their suffering, and their remorseless exploitations, occur on the thin veneer of our planet, a global killing field.
