

### Edge of the Universe

straight line forever?  
or, sphere's unbounded surface?  
but, four dimensions

Einstein scaled new heights  
dark matter, dark energy,  
spacetime's curve toward mass

booming since Big Bang  
ever-accelerating  
faster than light-speed

"edge" not border wall  
nothing visible beyond  
edge of time, not space

unlike universe  
this haiku's not infinite  
I've reached the edge now
