

Supermoon

good new day, old friend,
Monday morning supermoon,
so near, yet so far

since ancients looked up,
wondered, what is it? how far?
early wise men stumped

mother Moon stays moored
father Sun's steadfast partner
poets' crescent muse

mysteries unsolved,
millenia's gnawing awe,
mind's thirst left unquenched

Moon's birth pang now known:
wayward planet tore from Earth
still, this poet's muse
