

### Relationship Black Holes

like cosmic namesakes,  
energy goes in, none out  
darkly closed system

I bid for contact  
you star in my universe  
I care about you

I send a quantum  
bundle of warm energy  
checking our tether

best keep my distance?  
where's your event horizon?  
your heart's boundary?

Susan? no such doubt  
bright star lighting my spacetime  
our gravities meld
