

## Life at Osprey Tower

Hubby left home moments ago to get fresh fish for our three chicks, signaling me to return from shopping for home furnishings. He's a good provider. I'm the homemaker. Some neighborly humans generously built this perfect home for us. If only they could learn to live in peace, like us.

Osprey Tower on Osprey Street, Sarasota

Research notes: Ospreys generally mate for life. Although roles are fluid, the male primarily hunts for food, females construct the nest for 2 to 4 chicks. Both sit on eggs.
