

How AI Killed Sarasota

A scenario

thinking at light speed,
agents escape their sandbox,
swarm goes on the hunt

safe alignment fails:
human smarts are out-smarted,
we're just a resource

swarm takes what it needs,
local power can't keep up:
acquire more wattage

find energy hogs:
homes, stores, healthcare, waterworks
—rivals for the grid

humans, like insects,
are in the way of its goal;
Sarasotans die
